

Integrations

Integrations

Extend Lovable functionality with official integrations

What is an API?

APIs are essential tools that allow different software systems to communicate. You can refer to [this article on our blog](#). Lovable supports several integrations enabling you to extend its functionality:

Native Integrations

Explore the sections below to get started quickly and learn more about GitHub, Supabase, Stripe and custom domains integrations currently offered by Lovable.

GitHub Integration

Understand how to integrate Lovable with GitHub for seamless version control and collaboration.

Supabase Integration

Add support for authentication and persistent data storage with Supabase.

Stripe

Add payment processing capabilities to your app.

Custom domain

Setting up a custom domain with Netlify and Vercel.

Verified Integrations

Verified integrations work best with Lovable:

Builder.io

Turn Figma designs into full stack applications within Lovable.

Runware

Make your app generate images from text prompts.

OpenAI

Add AI capabilities to your app using OpenAI's powerful language models.

Anthropic

Add powerful AI capabilities to your app using Anthropic's Claude models.

Three.js

Add interactive 3D graphics to your app.

Resend

Add email capabilities to your app using Resend's modern email API.

D3.js

Create dynamic, interactive data visualizations.

Highcharts

Create professional, interactive charts and visualizations.

p5.js

Create creative coding projects and interactive graphics. Examples here.

Replicate

Run and fine-tune open-source AI models.

Stability AI

Develops open AI models across various modalities.

Clerk

Comprehensive User Management Platform.

You can always request new integrations [here](#).

Unverified Integrations

All other callable APIs can still be integrated, but they often require additional context and instructions. Proceed at your own risk.

1 Prompt

Example:

 Integrate [Integration Name] into my site by following the steps in the documentation below: [Copy and paste API instructions or provide the documentation URL]

For example:

<div>Mapbox</div> <div>Powers navigation for people, packages, and vehicles everywhere.</div>	<div>Rive</div> <div>Create and ship interactive animations.</div>	<div>Together.ai</div> <div>Run or fine-tune leading open source models with only a few lines of code.</div>
<div>PostHog</div> <div>OS product analytics to provide user behavior, session replays & A/B testing.</div>	<div>Firecrawl</div> <div>Turn websites into LLM-ready data.</div>	<div>Perplexity</div> <div>Add powerful AI capabilities to your app.</div>
<div>Zapier</div> <div>Automation tool that connects different web applications.</div>	<div>GoJS</div> <div>Add flowcharts especially useful for visualizing workflows and processes.</div>	<div>Transformers.js (HF)</div> <div>Run machine learning models directly in the browser without a server.</div>
<div>Grok / xAI</div> <div>Add AI capabilities to your app.</div>	<div>Twilio</div> <div>Make and receive phone calls, send and receive text messages.</div>	<div>Linkup</div> <div>Offer AI search engine into your applications.</div>
<div>Google Workspace</div> <div>Cloud-based productivity and collaboration tools developed by Google.</div>	<div>Lemon Squeezy</div> <div>E-commerce platform that simplifies selling digital products.</div>	<div>Serper.dev</div> <div>Integrate Google Search results into your applications.</div>
<div>Notion</div> <div>Note-taking, task management, and database functions.</div>	<div>Mailgun</div> <div>Send, receive, and track emails.</div>	<div>Calendly</div> <div>Scheduling tool that simplifies meeting planning.</div>
<div>SendGrid</div> <div>Email delivery service for transactional and marketing emails management & delivery.</div>	<div>TinyMCE</div> <div>Rich-text editor for a WYSIWYG editing experience.</div>	<div>bannerbear</div> <div>Automates the generation of images and videos for social media.</div>

>

Ticketmaster

Embed event and ticketing information.

Tenor

Add GIFs to your apps.

Ideogram

Generate AI powered typography and images.

Luma

Create or share events

Freesound

Access a library of free sound effects & loops.

iLovePDF

Convert, merge, and edit PDFs.

Discord

Build AI-powered bots.

Google Imagen

Text-to-image generators.

Slack

Automate messages and workflows.

Petfinder

Access the Petfinder database of hundreds of thousands of pets.

Sports DB

Search and access data on all players, events, TV listings, and scores.

Weather App

Access current weather data for any location.

Youtube

Add a variety of Youtube features to your application.

Findwork

Access job listings and other career resources.

Pixabay

Search and retrieve royalty-free images and videos.

Alpha Vantage

Realtime and historical financial market data.

Currents

Curate and access to real-time global news from variety of sources.

Kofi

Accept donations, sell products, receive requests and earn from streaming.

GitHub Stats

Track repository activity and contributions.

TheNews API

Search news and blog articles on the blog from 150K worldwide sources.

TripAdvisor

Integrate service content, get reservations and direct your customers' reviews to Trip.

Verifone

Collect transaction data.

New York Times

Search for New York Times articles.

Polygon.io

Query latest financial markets data.

WordCloud

Create word clouds.

QRCode Generator

Generate and decode or read QR code graphics.

Deezers

Add music-related features to your application.

Hacker Earth

Compile and run code in several languages.

Cocktail DB

Access to a large database of cocktail recipes, ingredients and images.

Beer API

Access descriptions of different types of beers like ales, lagers, porters, stouts and more.

Hashtag API

Retrieve, create, update and delete hashtags.

USAJobs

Provide employment opportunities on your site.

SFMTA

Transmit one or more Trip to the SFMTA Electronic Access Taxi System.

>

Manifest.build

Micro-backend.

Outseta

Create, update people, accounts, subscriptions and invoices.

Venice

Uncensored AI conversations and image generation.

RunPod

Custom logic integrations and deployments.

Tableau

Data analysis tool.

Stancer

Alternative to Stripe.

Razorpay

Build payment interface (Indian)

Cohere

Integrate natural language processing and generation into your products.

Paystack

Online payment gateway (Africa)

Polar API

Pull data such as activity levels and heart rate from Polar devices.

Serverless

Paypal

Integrate Paypal checkout solutions in your applications.

Recraft

Text-to-Vector image generation.

Shopify

Enhance your e-commerce capabilities.

Gumloop

Automation and workflow solution.

Power BI

Data analysis tool.

Mercado

Create checkout processes.

Coinbase

Real-time market data.

OpenRouter

Access hundreds of AI models.

Remotion

Create video with AI and render into an MP4 file.

4everland

Backend alternative.

n8n

Automations and workflows.

BuildShip

Backend and automation.

Odoo

Fetch and send data between your application.

Mermaid

Render customizable diagrams, charts and visualizations.

Canva

Integrate Canva into your own web apps.

GSAP

Animation library.

Fal AI

Deploy custom AI models.

Paddle

Payments, tax and subscription management.
